TechDoc 8.4 Release notes

This document describes the changes made between TechDoc version 8.3 and version 8.4.

Added: System Timeout. The system has an inactivity timeout that can be set in the local.ini or as a parameter to the executable. In the local.ini section [Setup] the timeout in minutes can be set with the parameter Timeout.

example 1:

```
[Setup]
```

```
Timeout=60
```

example 2:

```
"c:\program files\TechDoc\TechDocRun.Exe" /T 60
```

Fixed: In some installations the system did not load AutoCAD files with nested reference files

Fixed: Updated filters for viewing AutoCAD 2012 files.

TechDoc 8.3 Release notes

Added: TreeGrid.RecordMarkField. Property holding the Fieldname used to mark the record in the grid. This property is similar to the TreeGrid.RecordLockField but does not lock the record.

Added: TreeGrid.RecordMarkValue. Property holding the value for the field used to mark the record in the grid. This property is similar to the TreeGrid.RecordLockValue.

Added: TreeGrid.RecordMarkColor. Property holding the Color to mark the record in the grid with.

Fixed: Automatic sort of the treegrid

Fixed: Missing Crystal reports in installation

Fixed: In some installations the viewer crashed on certain file types

Fixed: Updated filter for viewing AutoCAD 2011 files.
